

Individual Trap Report: Dr. George Hall Public School Trap # EQP-CLL-577

Your classroom made an important contribution to the Fall 2016 [School Malaise Trap Program](#) and helped to make it a huge success. Your trap collected a total of 1100 specimens in week 1 and 453 specimens in week 2. Summed across the two weeks, your sample ranked 5 out of 67 for the total number of specimens collected. Within your sample, there were 134 species, which ranks your sample 4 out of 67 for species diversity. The species you collected came from several different groups (see pie chart below) and 37 species were *only* collected in your trap. Your class should be pleased to have made this contribution to the [International Barcode of Life](#) project, the largest endeavour in biodiversity science.
